

ENVIRONMENT AND SUSTAINABILITY POLICY

Perina Group operates with full appreciation and awareness that environmental protection and sustainability are principle to our ongoing success. All our operations must be considerate to the environment, the local community and aim to support the ongoing sustainability of the environment.

Perina Group seeks to meet its own environmental needs and expectations of clients, employees and the community by:

- Setting and continually reviewing measurable environmental objectives and targets. Backed by ongoing monitoring, reporting and analysis supporting continual improvement. In addition by accepting ongoing feedback at all levels.
- Prevent pollution and unnecessary resource consumption by maintaining systems and processes which facilitate the more efficient use of resources and improved waste management, waste avoidance, re-use and recycling.
- Seek to minimise equipment related environmental impacts including noise, vibration, water and air quality, land contamination, amenity and heritage.
- Promote a shared sense of ownership and responsibility for optimal environmental performance from management through to employees and contractors whilst developing a culture of environmental respect and appreciation.
- Encourage and support environmental awareness through ongoing training and development of competencies particular to specific environmental impacts related to on-site activities.
- Implement and maintain Perina Group procedures to ensure all potential aspects and environmental impacts are identified, evaluated and suitably eliminated or controlled.
- Foster and support continuous improvement at all levels including the identification of key environmental initiatives.

Compliance with this policy will be monitored, audited and continually reviewed so as to remain effective and aligned with all of our operations.

Simon Robinson
Managing Director
